

DATA SCIENCE

WORKSHOP SERIES

With the increase in demand for data science solutions at KAUST and across Saudi Arabia, the [KAUST VISUALIZATION CORE LAB \(KVL\)](#) is organizing the

INTRODUCTION TO DATA SCIENCE WORKSHOP SERIES

The workshop series helps graduate students, scientists, faculty members and industry practitioners from KAUST and Saudi Arabia build capacity in core data science tools and methods so they are able to begin building their own data science applications.

These workshops will also be the prerequisites for various advanced workshops we will offer later in the year.

The KVL team has offered the Introduction to Data Science Workshop Series every spring and fall semester since 2018. The workshops series has proven to be very popular, with the KVL team providing training to hundreds of individuals from KAUST and throughout Saudi Arabia.

All the trainings in this series will be hybrid such that Kaust registrants can attend in-person while any out of Kaust participants can attend via Zoom.

INTRODUCTION TO SHELL - FOR (DATA) SCIENTISTS

[Register Now >>](#)

 September 3, 2023  2:00 - 5:00 p.m.  BW B2 & B3, Level 0 Auditorium

INTRODUCTION TO CONDA - FOR (DATA) SCIENTISTS

[Register Now >>](#)

 September 12, 2023  2:00 - 5:00 p.m.  BW B2 & B3, Level 0 Auditorium

INTRODUCTION TO PYTHON - FOR (DATA) SCIENTISTS

[Register Now >>](#)

 September 17, 2023  2:00 - 5:00 p.m.  BW B2 & B3, Level 0 Auditorium

(Please register separately for each workshop you are interested in.
Registration slots are limited. Register early to book your spot.)
