

NAVIGATING THE RFS & INFINITY SYSTEMS

Sunday, September 18, 2022 1:30 - 2:30 p.m.

The Core Labs offer users a full-service facility which is accessed through a centralized Request For Service platform (RFS). RFS enables users to request Pocket ID approval, submit service requests, track progress and offer feedback.

Infinity is a cloud-based solution to manage shared instruments in the Core Labs. All users need an Infinity account to access these instruments and services.

Who is it for?

This session is designed for users of the Core Labs.
